

Mohamed Faskath

AI Systems Architect – AI Automation Consultant – Enterprise Solutions Architect

Email: faskath9054@gmail.com — GitHub: [Faskath513](https://github.com/Faskath513) — LinkedIn: [Profile](#) — Portfolio:
faskath.me — Phone: +94 75 750 7441

Summary

AI Systems Architect specializing in designing and deploying enterprise-grade AI ecosystems, autonomous agent networks, and AI-native operating systems that replace manual business processes with intelligent automation. I build multi-agent architectures, MCP-based systems, RAG pipelines, ERP intelligence layers, and AI orchestration platforms that enable organizations to reason, plan, and execute autonomously. Experienced in delivering production AI systems across construction, manufacturing, marketplaces, ERP platforms, and SaaS ecosystems.

Education

University of Moratuwa, Sri Lanka — B.Sc (Hons) Information Technology 2023 – Present

Kinniya Central College — GCE Advanced Level – Physical Science 2018 – 2021

Professional Experience

AI Systems Architect — Twixia (Pvt) Ltd 2026 – Present

- Architected enterprise AI agent ecosystems using Claude, OpenAI, Gemini, and custom MCP frameworks.
- Built autonomous multi-agent workflows for reporting, decision-making, and enterprise operations.
- Designed AI-powered ERP intelligence systems for automated business execution.
- Developed workflow automation pipelines using n8n, Directus, APIs, and event-driven architecture.
- Built communication agents (WhatsApp, Telegram, Email) for automated stakeholder operations.
- Integrated IoT and external APIs into centralized AI systems.
- Managed production deployments using Docker, Coolify, Linux VPS, and CI/CD pipelines.

Full Stack Engineer — SnapWerks (KINIT Pvt Ltd) Feb 2025 – Mar 2026

Platforms: snapwerks.lk snapwerks.nl

- Built AI-powered service marketplace with embedding-based recommendation systems.
- Built scalable Symfony + PostgreSQL multi-tenant backend architecture.
- Implemented SEO automation and AI-driven content generation systems.
- Designed AI-based workforce matching and ranking systems across multiple regions.

AI Platform Engineer — SriAI Platform KINIT (Pvt) Ltd

Platform: sriai.app

- Built localized AI platform providing access to Claude, OpenAI, and Gemini.
- Designed credit-based AI usage and billing system with analytics.
- Built unified AI orchestration backend with model routing and API management.
- Delivered affordable AI access infrastructure for Sri Lankan users and businesses.

Technical Skills

- **AI / LLMs:** Claude, OpenAI, Gemini, DeepSeek, RAG Systems, MCP Architecture
- **Agent Frameworks:** AgentZero, OpenClaw, LangGraph, CrewAI, AutoGen, LangChain
- **Orchestration:** n8n, Flowise, Dify, Trigger.dev, OpenWebUI
- **Backend:** FastAPI, Django, Symfony, Node.js, NestJS
- **Frontend:** Next.js, React, TypeScript, Tailwind
- **Databases:** PostgreSQL, MongoDB, Redis, Vector Databases
- **Infrastructure:** Docker, Coolify, Linux VPS, CI/CD, GitHub Actions

Featured Projects

QorvenzAI — AI Construction Operating System

qorvenzai.com

- AI-powered construction OS for planning, BOQ, procurement, and project intelligence.
- Multi-agent system for forecasting, risk analysis, and executive reporting.

Arwa Hub Fashion ERP

[ERP Platform](#)

- AI-powered manufacturing ERP for fashion industry.
- Includes OCR, forecasting, design AI, inventory, and procurement intelligence.

SnapWerks AI Marketplace Platform

snapwerks.lk — snapwerks.nl

- AI-powered service marketplace with semantic search and recommendation engine.
- RAG-based job matching and workforce intelligence system.

Agentix AI Labs & Twin Rentals [AgentixAI Labs POS](#)

- Built AI SaaS POS, ERP, and rental automation systems with WhatsApp AI agents.

Focus Areas

• AI Agents & Multi-Agent Systems • MCP Architectures • Autonomous ERP Systems • Construction AI Systems • Education AI Systems	• Enterprise AI Transformation • RAG + Vector Intelligence Systems • AI SaaS Platforms • Manufacturing AI Systems
